DESCRIPTION

In this course, basis for neuropharmacology will be covered and we will have an overview of the cellular and molecular brain, to understand why receptors and transporters represent more than 50% of all therapeutical targets and what are the future directions.

LEARNING OBJECTIVES

At the end of this course, trainees will be able to understand:

- Brain cells and organization
- Neurotransmitters
- Anatomy
- Metabotropic and ionotropic and receptors and their characterization
- Plasmic transporters
- Vesicular transporters

PRESENTED BY

Dr. Bruno Giros

Professor, McGill University
