French

### **FREE REGISTRATION**

[www.camccol.com](http://www.camccol.com)

## **DESCRIPTION**

This course will outline importance and methodological considerations surrounding the integration of sex and gender in pharmacoepidemiology through lectures, group discussions and examples drawn from the medical literature.

## **LEARNING OBJECTIVES**

- Understand the importance of integrating sex and gender in pharmacoepidemiology
- Overview the different options for measuring sex and gender in existing databases studies or in the context of prospective data collection
- Know best practices in terms of sex- and gender-based statistical analysis

## **PRESENTED BY**

***Dr. Anais Lacasse***

Full Professor
